

Roof Dry-In Remote Inspection Form

All fields are required

1. Provide the address and Building Permit Number

2. Provide the name of your company and contact information

3. Select your roofing material

Asphalt Shingles

Metal Roof

Panels Membrane

4. What is the roof pitch(s)

Less than 4/12

More than 4/12

Combination of less than 4/12 and more than 4/12

More than 8/12

5. Send pictures to Remote@missoulacounty.us from the ground and from the roof from different angles. Showing overhangs, address, and clearing showing the pitch with a 2' long roof pitch finder. Clearly show ice and water shield extending to 2' inside of conditioned space per IRC 905.1.2. Identify locations of kick flashing that will be installed per IRC 2021 9103.2.1 If there are no wall intersections where kick flashing will be installed, do not upload any pictures.

Yes, Acknowledged

6. For Asphalt Shingles roof pitches **less than 4/12** require ice and water shield the entire roof pitch. Or underlayment **lapped 19" in ADDITION** to the ice and water shield extending 2' into the conditioned area per IRC table 905.1.1(2). Drip edge must be installed under the underlayment on the eave end of the roof and over the underlayment on the rake ends of the roof per IRC 905.2.8.5.

Yes, Acknowledged

7. You must wait until you receive an email confirmation that the dry-in remote inspection has passed before covering the roof. If you proceed ahead without confirmation and the inspector identifies a code issue, then you are liable for fixing the problem.

Yes, Acknowledged

8. Attach this form, filled out, to an email with your pictures and send to remote@missoulacounty.us. You can also screenshot this form and attach it as a picture to your email.
